Problem Statement

Most hospitals are still facing several challenges with Hospital Management System because some of them are still using manual processes, while those who are using computerized method are also facing the challenge of adjusting to it. Like:

- The high cost of software development and deployment.
- Complex design in terms of User Interface and User Experience (UI/UX Design)
- Fear of data security breach.
- Difficulty in migrating from manual processes, because both staff and patients are used to the manual processes and so are unable to speedily cope with the new system.
- Lack of IT-friendly medical personnel is also presenting several challenges.
- A Huge influx of patients visiting government hospitals makes the process of migrating to automated processes highly difficult. They do not have the patience to wait for registration and data entry and often fail to understand the functioning of automated processes.

Project Description

Project Description	
Project Name:	Cura HMS
Team Name:	Medical Maestros
Project Description:	<p>CURA helps to automate routine tasks, optimize staff coordination, improve communication, distribute the workload, store different types of information, and provide financial and HR management.</p> <p>For patients who want to book an appointments, the CURA is a web app that provides a hassle-less to book an appointment with doctor, unlike the traditional way where we had to call or text and ask for doctor's availability our cura app is a tool that collects data about patients, doctors, staff, hospital administrative details in one software.</p>
Benefit Outcomes:	<ul style="list-style-type: none">● Patients can book appointments with particular Doctor according to their preferred date and time .● Doctors can see the appointment list of patients and schedule his duties at hospital .

Team Working Agreement

TEAM AGREEMENT

Introduction

The purpose of this team working agreement is to outline standardized expectations for the Lightning Bolt project concerning, but not limited to, the working relations and group structure among team members in CS-691. The contents herein addressed are:

1. Communication
2. Decision making
3. Responsibility
4. Participation
5. Leadership
6. Consequences

The members of the team are:

1. Sai Teja ~~Koribilli~~
2. Jigar J Shah
3. ~~Shivansh Tomar~~
4. Nikhil ~~Kasireddy~~
5. Mounika Krishna ~~Thalla~~
6. Kuldeep Raj Kaluvala
7. ~~Bindu Valishetti~~

Communication:

Communication between team members shall be through e-mail, phone conversations, and weekly team meetings. Members will check their e-mail once daily and reply when requested or necessary.

Leadership

Leadership is strictly informal with a democratic debate system used for decision-making. A primary meeting facilitator will be assigned prior to each meeting. The facilitator will be responsible for compiling an agenda and directing the smooth flow of the meeting. Natural leadership will evolve over time, and this working agreement shall be edited to accommodate such future logistical changes.

Group Progress

The group will create a timeline that includes dates for expected completion of work and other group objectives. This timeline will help the group to determine progress and how rules should be enforced regarding participation of each group member.

Consequences

Consequences will be based on a strike program with three strikes resulting in a probationary status and four strikes resulting in removal from the team. While on probation the team member must demonstrate his/her ongoing commitment to the team by writing an explanatory paper and requesting reinstatement to the team.

Strikes may be given for any one of the following reasons:

1. Missed meetings without either communication 24 hours prior or a legitimate conflict.
2. Failure to abide by the rules presented in this working agreement.
3. Low commitment and substandard work presented in assigned tasks.

Summary

The ideas and requirements set forth in this working agreement are established to provide the best possible working conditions for completing the assigned project.

If you have any questions concerning this memo, or the contents therein, please direct them to the group secretary:

Sai Teja ~~Koribilli~~

PERSONAS

Persona 1

Disha Shah

Demographics

Location : New York

Age : 28

Occupation: Doctor

Personality

Bio

Disha is a young doctor working at Newyork health center. On daily basis she booked for 30-40 appointments and also attends the emergency patients. She ensures every patient of her treated with correct medication and attention.

Interests

- She loves to stay updated about new medicines and procedures in the medical field.
- She loves to attend music concerts.

Frustrations

- She attends approximately 40 patients in a day, so it is hectic to keep up with the provided schedule.
- Mixing of patient's information may happen resulting in wrong medication.

Goals

- Needs correct information of the patients receives appropriate medication and treatment.
- By using the CURA Hospital Management System, Disha is aided with correct records of the patient.
- Need to have proper inventory information, by using CURA Hospital Management System, Disha has records of the inventory.

Persona 2

Mary

Demographics

Location : New York

Age : 81

Personality

Bio

Mary lives in New York suffering from Asthma, Lyme diseases and she has to undergo monthly check-ups with the Doctor.

Interests

- She loves Jazz Music
- She is Die-hard of New York Knicks & frequently goes to matches to cheer them.

Frustrations

- Every time Mary visits the hospital an appointment forms has to be filled and she is allotted a different doctor.
- She has to wait for long hours to visit the doctor.
- Every week her records get updated which becomes troublesome for her to manage

Goals

- Needs to fill up the form only once during registration on CURA which saves her time and effort from filling the form every time.
- Through CURA she can book appointment with the preferred doctor.
- CURA provide proper slots to Mary, so she does not have to wait in queues & can also choose online consultation.

Persona 3

Tyler

Demographics :

Location : New York

Age : 38

Occupation : Admin

Personality

Bio

Tyler is 38 years old residence of New York working as an Admin who manages the New York Health Center in various ways. He ensures proper stock of medicines and equipment needed in the hospital.

Interests

- He loves pets and frequently visits shelter care on holidays.
- He is shutterbug and loves traveling.

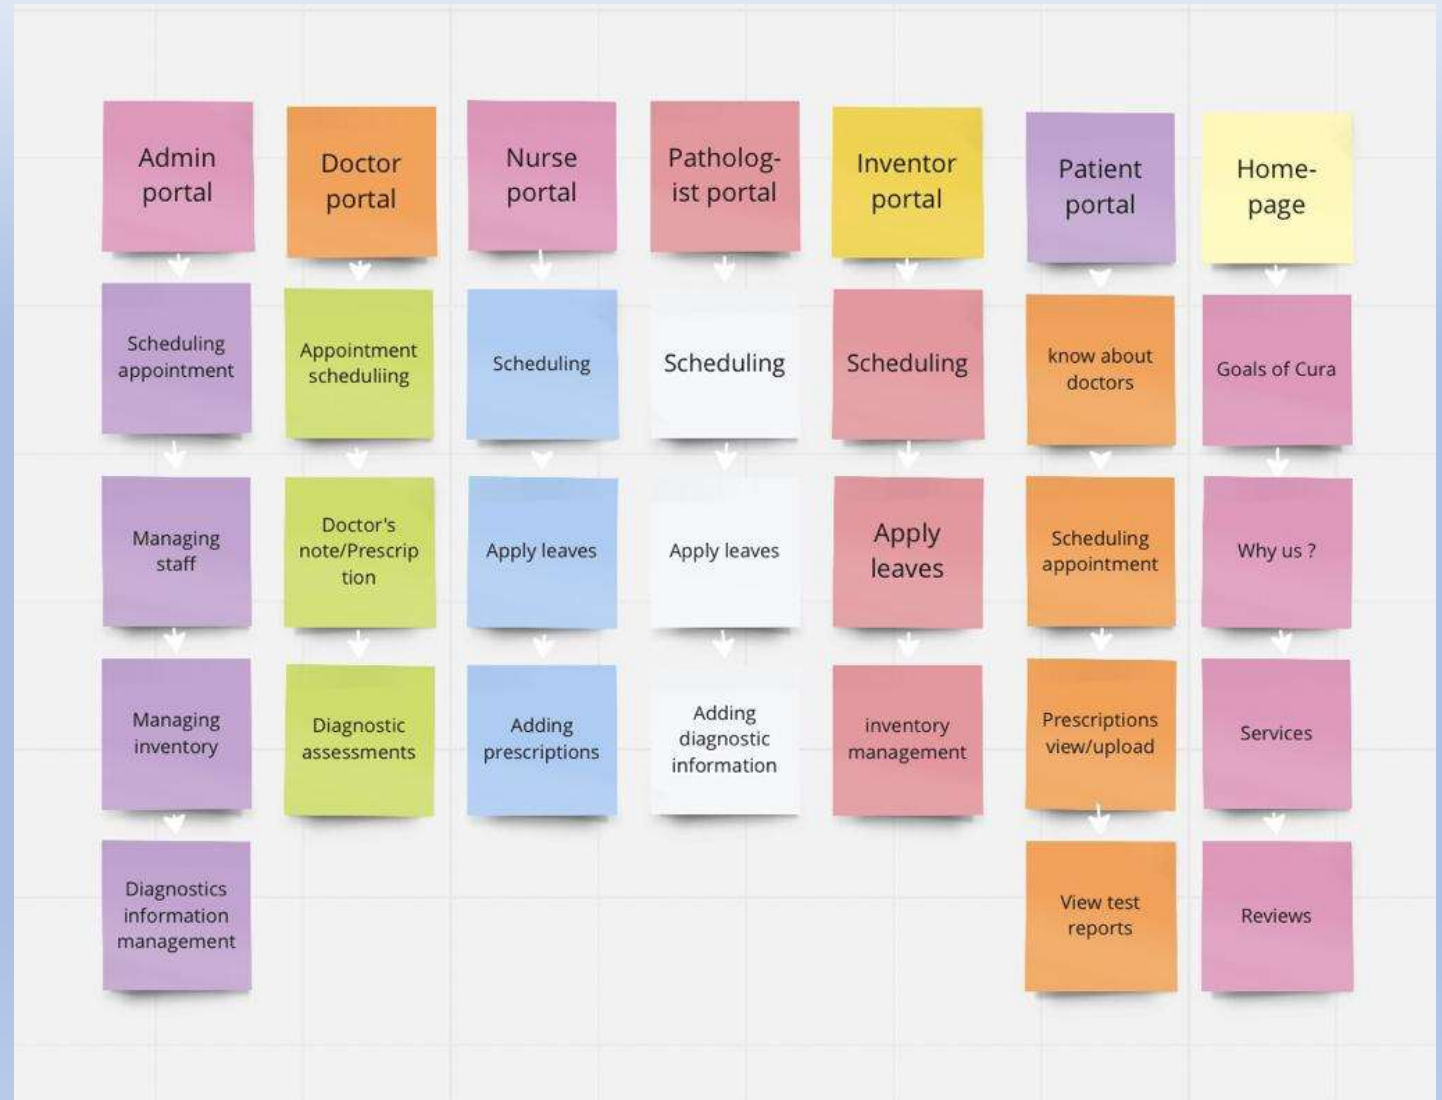

Frustrations

- He manages appointments, inventory and other records on different platforms making it disordered for him.
- He has to be in the hospital to ensure the proper management of the hospital.

Goals

- Needs a single platform where he can manage appointments, Doctor's profile and inventory.
- This problem is solved by CURA Hospital Management System so he can have records of patients, update doctor's profile and also, he allows to simplify all these tasks and remotely as well.

TOOLS

Algorithm

The proposed system has five modules for doctors, admin, pathologists, inventors and patients providing facilities for appointment schedules, payment, viewing online information, register on hospital website. The whole process of information sharing and processing in this system is automated through the Decision Tree ID3 algorithm

What is ID3 Algorithm?

ID3 stands for Iterative Dichotomiser 3 and is named such because the algorithm iteratively (repeatedly) dichotomizes(divides) features into two or more groups at each step.

ID3 uses a top-down greedy approach to build a decision tree. In simple words, the top-down approach means that we start building the tree from the top and the greedy approach means that at each iteration we select the best feature at the present moment to create a node. Attempts to create the smallest possible decision tree.

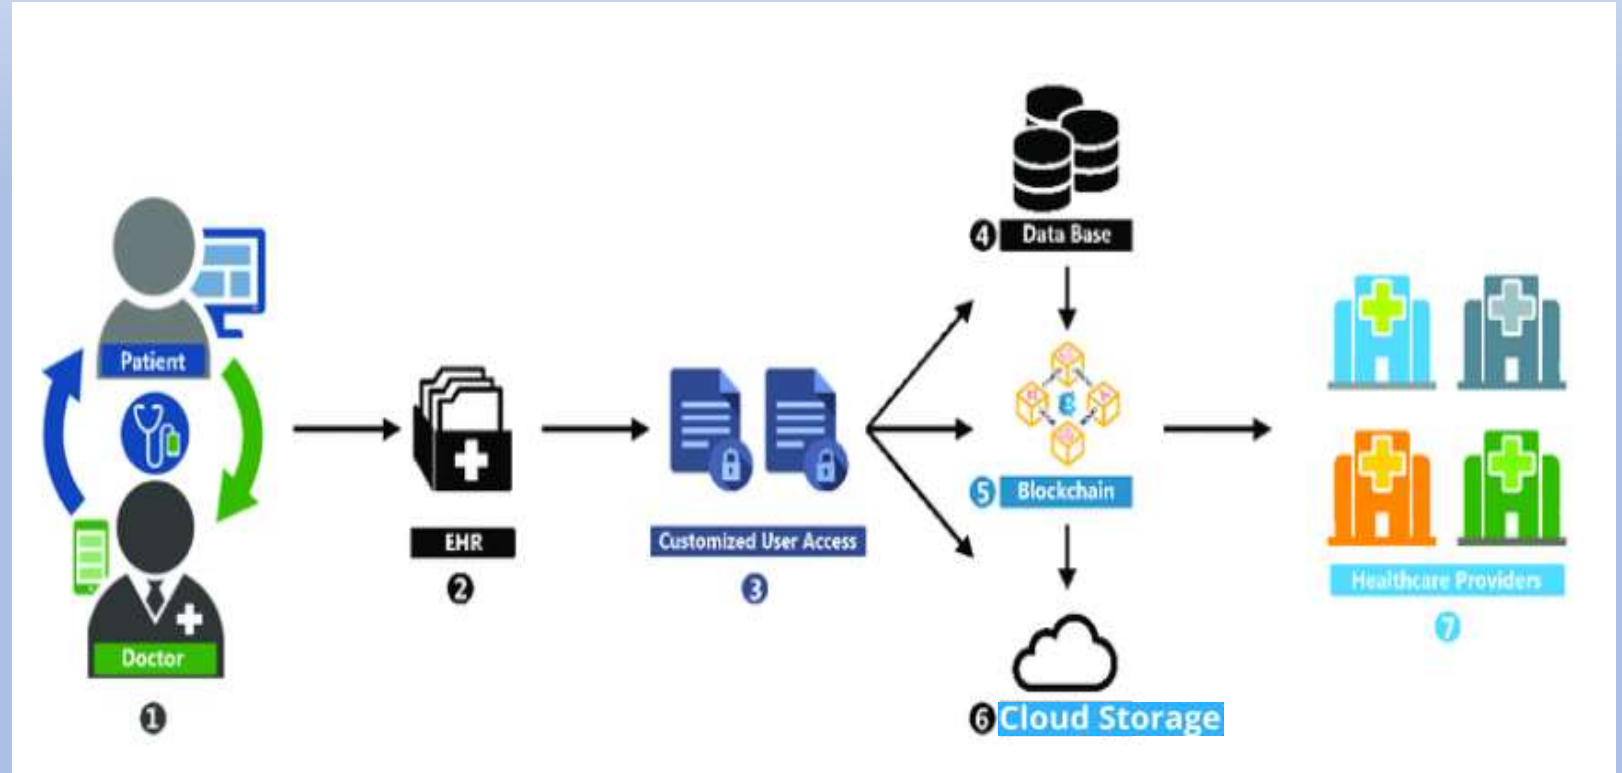

ID3 ALGORITHM

- Before you inquire, the response to the question: "How does ID3 choose the best feature?" is that ID3 uses Information Gain, or simply Gain, to identify the best feature.
- Information Gain determines the entropy decrease and assesses how effectively a particular feature categorizes or separates the target classes. The most effective feature is the one that has the greatest Information Gain.
- Simply put, entropy is a measure of disorder, and a dataset's entropy is a measure of disorder in the feature that is being measured.
- Entropy is 0 for homogeneous (similar) values in the target column in the case of binary classification (where the target column has only two types of classes), and it is 1 for equal numbers of values in the target column for both classes.

SPRINT SUMMARY

SPRINT 1

Issue Type	Key	Name
Task	CURA-4	Work on deliverable 1 presentation
Task	CURA-3	Establish weekly meetings
Task	CURA-5	Establish team roles
Task	CURA-1	Setup development tools (GitHub and Jira)
Task	CURA-2	Create a significant business application

Issue Type	Id	Name	Story Points Estimate
Story	CURA-10	As a patient, I want to register and sign in successfully, so that I can store all my account details.	3
Story	CURA-13	As a doctor, I want to go-through the appointments list.	3
Story	CURA-15	As a patient, I want to book an appointment.	3
Story	CURA-16	As an admin, I should be able to access and manage all the data and modify according to requirements.	5

SPRINT 2

Issue Type	Id	Name	Story Points Estimate
Story	CURA-12	As an Inventor, I want to know whether the supplies are as per the requirement or no, so that I can re-stock them.	3
Story	CURA-14	As an Admin, I want to navigate to the billing section to check whether the bills produced are accurate or not.	5
Story	CURA-15	As a Staff, I want to check room availability and manage rooms according to requirements.	3

SPRINT 3

Burndown Chart Sprint 3

Issue Type	Id	Name	Story Points Estimate
Story	CURA-16	As a Patient , I would like to update my profile so that I can update my Name, Address, and Phone No. in it.	3
Story	CURA-18	As a Patient , I would like to book an appointment with a specific doctor so that will be easy to find solution for my problem.	3
Story	CURA-20	As a Patient, I would like to have a landing page that det ails all the advantages of the platform in order to encourage me to sign up.	3
Story	CURA-25	As a Doctor , I want to see appointment list so that I will get an idea how many patients book an appointment through portal.	3
Task	CURA-26	Final Technical Paper	5

SPRINT 4

Issue Type	Key	Name	Story Points Estimate
Story	CURA - 39	As a patient, I want to be able to search on the app, so that I can find the necessary information .	3
Story	CURA - 40	As a patient, I want to update my profile and also upload reports so that doctor can know the patient condition.	3
Story	CURA - 41	As an admin, I want to see all the doctor's list in the application so that, I can manage the system according to my need.	3

SPRINT 5

Issue Type	Key	Summary	Story Points Estimate
Story	CURA – 31	As a Patient, I want to submit my symptoms/previous history documents in the portal for assessment so that I may receive a accurate determination .	3
Story	CURA - 30	As a Patient, I want to confirm whether my appointment with the doctor is set up or no so that I can have an idea about my appointment with doctor.	3
Story	CURA - 33	As a Pathologist, I want to know whether samples of the patient are correctly entered or no, so that there is no confusion with patient's details with others.	5
Story	CURA-37	As a Pathologist I want to upload patient test results in portal so that it will be easy to check report for Doctor before patient’s appointment .	3

30

SPRINT 6

User Story Id	Summary	Story Points Estimate
CURA-29	As a Doctor, I want to see my particulars/schedule/profile on the application so that I can plan my duties at the hospital.	3
CURA-34	As an Admin, I want to navigate to doctor/staff/nurse section to check the log-in time so that I can verify whether every doctor/nurse/staff is attending the hospital on time.	5
CURA-39	As a nurse, I want to see the prescriptions given by the doctor to the patients through the nurse portal.	3
CURA-32	As an Inventor, I want to know whether the supplies are as per the requirement or not so that I can re-stock them.	3

SPRINT 7

USER STORIES & ACCEPTANCE CRITERIA

User Stories & Acceptance Criteria

UserStory ID	Summary	Status
	As a Doctor, I want to see my particulars/schedule/profile on the application so that I can plan my duties at the hospital.	
CURA-29	Scenario: The doctor wants to check his schedule at the hospital Given I logged in as a Doctor When I open the application and go to this page then see the appointment list of patients and see the page to see their previous history & symptoms.	Done
CURA-32	As an Inventor, I want to know whether the supplies are as per the requirement or not so that I can re-stock them. Scenario: An Inventor wants to check the supplies at the hospital Given I logged in as an Inventor When I open the application and go to this page then see the inventory supply details page, clicking on the page I should be able to see all the inventory details and the option to restock.	Done
CURA-34	As an Admin, I want to navigate to the doctor/staff/nurse section to check the log-in time so that I can verify whether every doctor/nurse/staff is attending the hospital on time. Scenario: Admin wants to check all user's log-in & log-out times Given I am in the role of logged-in Admin When I open the portal then in the system, I can check the total hour a doctor/staff/nurse spends seeing patients And also verify the doctor/staff/nurse's time.	Done
CURA-39	As a nurse, I want to see the prescriptions given by the doctor to the patients through the nurse portal. Scenario: Nurse wants to check the prescriptions of patients Given I'm in the role of Nurse or logged in as the nurse When I open the web application then see the prescriptions tab and click on it and verify them in the portal.	Done

User Stories & Acceptance Criteria

User Story ID	Summary	Status
	<p>As a Patient, I want to submit my symptoms/previous history documents in the portal for assessment so that I may receive a accurate determination</p>	
CURA-31	<p>Scenario : Patient wants to upload his previous history documents & symptoms Given I logged as Patient When I open the application and go to this page then see the browse option for uploading the documents and see the page to enter the details of my previous history & symptoms.</p>	Done
CURA-30	<p>As a Patient, I want to confirm whether my appointment with the doctor is set up or no so that I can have an idea about my appointment with doctor</p> <p>Scenario : Patient wants to check with his appointment details Given I logged as Patient When I open the application and go to this page then see my appointment details with the doctor and I plan accordingly.</p>	Done
CURA-33	<p>As a Pathologist, I want to know whether samples of the patient are correctly entered or no, so that there is no confusion with patient's details with others.</p> <p>Scenario : Pathologist wants to check patient's samples Given I am in a role of logged-in Pathologist When I open web-application and go to this page then verify the patient's samples entered correctly or not</p>	Done
CURA-37	<p>As a Pathologist I want to upload patient test results in portal so that it will be easy to check report for Doctor before patient's appointment .</p> <p>Scenario : Pathologist wants to upload test reports Given I'm in a role of Pathology or logged-in pathology When I open the web application then see the reports tab and click on it and upload test results in portal.</p>	Done

UserStory ID	Summary	Status
	<p>As a Patient, I want to register and sign in successfully, so that I can store all my account details.</p>	
CURA-10	<p>Scenario : Patient wants to register and sign into application Given I logged as Patient When I open the application and go to this page Then I should easily create an account and sign in where I can store my account information.</p>	Done
	<p>As a Patient, I want to book an appointment with Doctor so that I can have an idea about my appointment with doctor .</p>	
CURA-15	<p>Scenario : Patient wants to book his appointment Given I logged as Patient When I open the application and go to this page then I should check an option for appointment with the doctor and I plan accordingly.</p>	Done
	<p>As an Admin I want to reschedule the appointments or even cancel the appointments with Doctors so that it will be not so hectic for doctors with the appointments .</p>	
CURA-40	<p>Scenario : Admin wants to cancel or reschedule appointments Given I am in a role of logged-in as Admin When I open web-application and go to this page then I can able to cancel or reschedule the appointments with doctor.</p>	Done
	<p>As an Admin, I want to rate the Doctor and also adding hospitals list for referrals to patients if any further assistance needed for diagnosing the disease so that it might helpful to patients.</p>	
CURA-41	<p>Scenario : Admin wants to rate Doctor Given I'm in a role of Admin or logged-in Admin When I open the web application Then I can able to give rating for Doctor and also give referrals to patients if any further assistance needed.</p>	Done

User Stories & Acceptance Criteria		
User Story ID	Summary	Status
	As an Admin I want to add doctors, add staff, view the details, and can also modify them.	
CURA-35	Scenario :Admin wants to add staff, doctors etc. Given I logged as an Admin When I open the application and go to this page Then I should easily add staff & Doctors and can also view account information . As a nurse, I want to write prescriptions for the patients as directed by the doctor and can also upload prescription documents also.	Done
CURA-38	Scenario :Nurse want to update prescriptions Given I logged as Nurse When I open the application and go to this page then I should check an option for updating patient prescriptions as directed by the Doctor.	Done

TEST CASES

Test Cases

Stories Completed and Stories Not Completed

User Story Id	Summary	Story Points Estimate	Status
CURA-40	As an Admin I can able to reschedule the appointments or even cancel the appointments with Doctors.	3	Done
CURA-41	As an Admin, I can be able to rate the doctor and also adding hospitals list for referrals to patients if any further assistance needed for diagnosing the disease .	3	Done
CURA-38	As a nurse, I want to write prescriptions for the patients as directed by the doctor and can also upload prescription documents also.	3	Done

METRICS

Team Velocity

Burndown chart

Committed/ Completed Ratio

RETROSPECTIVE

What went well?

- The sprint was well-planned and structured, with clear tasks and deadlines assigned to each team member.
- The team had a good understanding of their data and how to visualize it to the user.
- Communication was open and transparent, which helped build a strong team dynamic and fostered collaboration.
- The team also experimented with new processes, held regular retrospectives.

What did not go well?

- The team missed few regular meetings and faced last-minute availability changes, which affected the sprint's progress.
- Proactive problem-solving skills were lacking, and the testing process was not as efficient as expected, resulting in last-minute bug fixes.
- The team also had difficulties estimating subtasks and not conducting calls that used to happen more than thrice a week.
- Additionally, some test cases did not meet the required parameters, and some deadlines were not adhered to.

What needs improvement?

- The team should resume regular meetings and establish a process for proactive problem-solving to minimize delays.
- To improve the testing process, QA should be involved earlier in the development process, and all subtasks should be estimated at the beginning of the sprint.
- The team should conduct two weekly calls as before to share updates and discuss their schedules.
- Thorough integration and smoke testing should be done in the last deliverable, and something like daily standups should be held to facilitate collaboration and help teammates who need assistance.

Improvements made from Professor Feedback

Feedback

- The order of priority for user stories should be listed in descending order.

Improvements

- Updated user stories according to their priority order.
